STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. WHITEHOUSE (for himself and Mr. HATCH):

S. 3431. A bill to amend the Controlled Substances Act to more effectively regulate anabolic steroids; to the Committee on the Judiciary.

Mr. WHITEHOUSE. Mr. President, today I am pleased to join Senator HATCH in introducing the bipartisan Designer Anabolic Steroid Control Act of 2012. This measure will help keep American children and families safe from dangerous designer drugs that masquerade as healthy dietary supplements. This legislation is based on Senator Specter's work in the previous Congress, and I thank him for his leadership on this issue.

Doctors and scientists have long recognized the health hazards of non-medical use of anabolic steroids. For that reason, Congress has previously acted to ensure that these drugs are listed as controlled substances. Nonetheless, according to investigative reporting and Congressional testimony, a loophole in current law allows for designer anabolic steroids to easily be found on the Internet, in gyms, and even in retail stores.

Designer steroids are produced by reverse engineering existing illegal steroids and then slightly modifying the chemical composition, so that the resulting product is not on the Drug Enforcement Administration's, DEA, list of controlled substances. When taken by consumers, designer steroids

can cause serious medical consequences, including liver injury and increased risk of heart attack and stroke. They may also lead to psychological effects such as aggression, hostility, and addiction.

These designer products can be even more dangerous than traditional steroids because they are often untested, produced from overseas raw materials, and manufactured without quality controls. As one witness testified at a Crime Subcommittee hearing in the last Congress, "all it takes to cash in on the storefront steroid craze is a credit card to import raw products from China or India where most of the raw ingredients come from, the ability to pour powders into a bottle or pill and a printer to create shiny, glossy labels."

The unscrupulous actors responsible for manufacturing and selling these products often market them with misleading and inaccurate labels. That can cause consumers who are looking for a healthy supplement—not just elite athletes, but also high school students, law enforcement personnel, and mainstream Americans—to be deceived into taking these dangerous products.

Loopholes in existing law allow these dangerous designer steroids to evade regulation. Under current law, in order to classify new substances as steroids, the DEA must complete a burdensome and time-consuming series of chemical and pharmacological testing. As a DEA official testified before Congress: "in the time that it takes DEA to administratively schedule an anabolic steroid used in a dietary supplement product, several new products can enter the market to take the place of those products."

The Designer Anabolic Steroid Control Act of 2012 would quickly protect consumers from these dangerous products. First, it would immediately place 27 known designer anabolic steroids on the list of controlled substances. Second, it would grant the DEA authority to temporarily schedule new designer steroids on the controlled substances list, so that if bad actors develop new variations, these products can be removed from the market. Third, it would create new penalties for importing, manufacturing, or distributing anabolic steroid's under false labels.

Senator HATCH and I have worked closely with a range of consumer and industry organizations to ensure that this legislation would not interfere with consumers' access to legitimate dietary supplements. I am pleased that the measure has been endorsed by the United States Anti-Doping Agency, the Alliance for Natural Health, the Council for Responsible Nutrition, the American Herbal Products Association, the Natural Products Association, the Consumer Health Products Association, and the United Natural Products Alliance.

I thank these organizations for their support, and look forward to working with them, with Senator HATCH, and

with colleagues from both sides of the aisle to enact this common sense measure into law.

Mr. President, I ask unanimous consent that letters of support be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD as follows:

AMERICAN HERBAL PRODUCTS ASSOCIATION,

Silver Spring, MD, July 23, 2012.

Hon. ORRIN HATCH,

*U.S. Senate,
Washington, DC.*

Hon. SHELDON WHITEHOUSE,
*U.S. Senate,
Washington, DC.*

DEAR SENATORS HATCH AND WHITEHOUSE, This letter is to communicate to you the support of the American Herbal Products Association (AHPA) for your pending legislation, the Designer Anabolic Steroid Control Act of 2012. AHPA recognizes the need to more effectively regulate anabolic steroids, as this bill's amendment of the Controlled Substances Act would do. The expanded controls on these substances that would be implemented by your legislation would protect consumers by better ensuring that these are not misrepresented as legitimate dietary supplements, when clearly they are not.

Please do not hesitate to contact me if there is anything that AHPA and its members can do to assist in the passage of this important legislation.

Sincerely,

MICHAEL MCGUFFIN,
President.

NATURAL PRODUCTS ASSOCIATION, *Washington, DC, July 23, 2012.*

Hon. ORRIN HATCH,
*U.S. Senate,
Washington, DC.*

SENATOR HATCH, I write today on behalf of the Natural Products Association (NPA) to thank you for introducing the Designer Anabolic Steroid Control Act of 2012 (DASCA). As the leading representative of the dietary supplement industry with over 1,900 members, including suppliers and retailers of vitamins and other dietary supplements, NPA works to ensure that consumers have access to safe dietary supplements. We believe that this bill will make the marketplace safer.

Our support for this legislation demonstrates NPA's commitment to removing anabolic steroids, which are not dietary ingredients, from the market. NPA has worked in conjunction with the FDA to bring attention to spiked products masquerading as dietary supplements. This bill helps protect consumers who believe they are purchasing "legal" supplements but may suffer health effects from steroid use.

Even with the passage of the Anabolic Steroid Control Act of 2004, the Drug Enforcement Administration (DEA) has removed very few substances. The DEA has to follow a strict set of testing standards to schedule a substance and remove it from the market. This process can take up to three years to complete; but while this process is taking place, the products remain on the market. This bill gives the DEA the power to temporarily remove products from the market while testing is completed, giving them the ability to stay ahead of the individuals who are creating these designer drugs.

Thank you for introducing this important legislation and your tireless work on behalf of the dietary supplement industry.

Regards,

JOHN SHAW,
NPA Executive Director and CEO.
